

OS/1337
System (Image)

Linux KERNEL
bzImage
(xz-compressed image)

musl C-LIBRARY
(All binaries are statically linked against it!)

INITRAMFS
rootfs.cpio.xz
(xz-compressed cpio archive)

USERLAND
/bin/toybox
(provides bash-compatible shell and basic tools)

SSH-Client
/bin/dbclient
(dropbear as standalone client-only binary)

TEXT EDITOR
/bin/kilo
(a lightweight minimalist editor)

CONFIGURATION FILES
/etc/init
(necessary settings to get the system useable)

OTHER STUFF
customizations
(Based off targeted platform and image size)

BOOTLOADER
[currently syslinux, plans to shift to mlb; should be drop-in regardless]
